

ICE MACHINES

Need ice? We have the perfect machine for your business

From self contained Ice makers through to Industrial scale ice makers, we'll find the right machine for your business.

Service & Support

Environmental Sustainability

Sustainability and the Environment

Ultra Refrigeration are committed to helping you minimise your carbon footprint, with advanced designs such as the Prodigy models, which minimise energy and water use. Ultra promotes the principle of 'designed-in-simplicity', to make looking after your machine as easy as possible. For example, cleaning the air filter on a compact backbar unit is a two-minute job, rather than a service call-out. This minimises downtime and cuts servicing costs.

Scotsman machines comply fully with all relevant regulations including WRAS, RoHS and WEEE. In support of your Environmental and Sustainability Policy, Ultra can offer specific carbon footprint data for each Scotsman machine.

Looking for advice? Call the Ice Experts now on 0330 2232404

Ultra Refrigeration are authorised distributors of Hubbard Systems, the UK's leading specialist distributor of ice making equipment and has been associated with Scotsman for nearly 50 years. Hubbard is known for its expertise and for the professionalism of its pre- and after-sales support.

In the 2013 customer satisfaction survey, Scotsman came top in the quality ice machine equipment category and Hubbard Systems scored over 90% in all question categories, including ease of contact, enquiry handling, delivery, accuracy and technical support.

Scotsman makes ice machines for every market and industry, from compact back bar supercubers for hospitality to huge machines making scale ice for the fishing industry. Many of the standard models are available ex-stock for next day delivery, free to the UK mainland.

What's your ice type?

Supercube, dice, flake, superflake, scale, cubelet, nugget... Ultra's Ice Experts can advise on every aspect of ice production, including which type of ice is best for every application.

Supercube

Supercube ice

- The most popular type of ice cubes, a perfect choice for restaurants, pubs, and clubs. Made in the famous Scotsman thimble shape, they are available in four different sizes.

Cubelet Ice

Cubelet ice

- Hands free dispensed ice made from hard compacted flake ice in a uniformed cubelet shape with a slow melt rate.

Scale Ice

Scale ice

- Scotsman Scale Ice machines manufacture ice in a range of thicknesses, from 1.2mm as preferred by the food processing industry to 2.2mm as demanded by the fishing industry. Scale Ice is produced in heavy-duty cylindrical evaporators designed for the most rugged applications.

Dice Cube

Dice ice

- The shape of dice cubes provides maximum liquid displacement making this type of ice cube ideal for general purpose cooling of drinks. They can be made very quickly and are ideal for outlets needing high volumes of ice, such as fast food outlets.

Flake Ice

Flake ice

- Flake Ice is the most natural shape. Extruded at a temperature just below zero degrees. Scotsman flaked ice suits a variety of applications including fisheries, laboratories and industry.

Nugget Ice

Nugget ice

- Nugget ice is made from random cylindrical sized pieces of hard compacted flake ice, which have a slow melt rate.
